

MEETA Regional Event

MEETA, in conjunction with Reliance Bearing and Gear Company Ltd and Schaeffler (UK) Ltd, is holding an evening technical presentation on the whole area of condition monitoring.

Date: 27th November 2012

Start time: 17:00

Venue: Reliance Bearing and Gear Co. Ltd

Cork, (Head Office)
50 Eastgate Drive,
Eastgate Business Park,
Little Island,
Cork.

Condition monitoring

Condition monitoring (CM) contributes to achieving high availability and long life of all machinery and plant. CM products help in planning maintenance work and reducing costs. The range includes devices for the alignment of shafts and belt pulleys. Temperature measuring and sonar devices make it possible to check the operating condition. An important element of the range comprises measuring systems that monitor vibration, torque and lubricants.

Presenter

Ian Pledger is the dedicated Schaeffler CM expert in the UK working alongside a dedicated staff dealing purely in CM applications from presentation to installation. Ian has many years experience in CM and has been directly involved in all installations in Ireland since 2005. His presentation on the night of 27th November will be approx 2 – 2 ½ hours in duration and will cover all aspects of CM including thermography , vibration , acoustics and lubrication analysis.

Booking

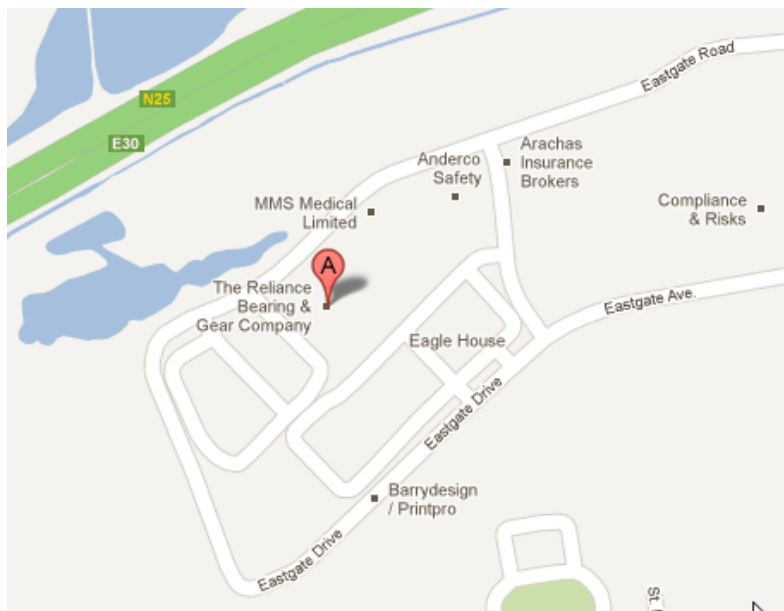

Places are limited so early booking is essential. For booking please email me at:

enbergin@gmail.com

stating your name, company and the event.
