

EVENING LECTURE

Energy and Environment Division
in association with
Engineers Ireland Agriculture & Food Division
Engineers Ireland Cork Region and;
The Energy Institute

Applying Energy Efficient Design to Achieve World Class Energy Efficiency at St James Gate New Brewery

Date: Wednesday 6th March 2013

Time: 18:30 (sharp)

Venue: Engineers Ireland, 22 Clyde Road, Ballsbridge, Dublin 4

About the Event;

Diageo are currently undertaking the largest brewery investment in the world at St James Gate.

This lecture will identify the design philosophies and strategies adopted, the innovative technology being deployed on the project.

The lecture will also look at the role of leading edge suppliers used to deliver best in class energy efficiency, as well as the lessons learnt to date.

It is considered that the approach and technologies adopted could equally be applied to the large scale milk processing plant expansions now being planned in Ireland and would also be of relevance to the pharmaceutical sector

The Speaker;

Mr Conor Brown, Global Beer Capital Strategy Manager Diageo

Participate on-line

The lecture will also be available live on webcast; <https://engineersireland.webex.com>
