

Membership application

Meeta, the Irish Maintenance and Asset Management Society, is a society within Engineers Ireland. Meeta actively encourages and promotes the implementation of the best practice in asset management and asset care and represents the interests of engineers and practitioners working in this field.

“A strong voice for maintenance and asset management in Ireland.”

Mission Statement

That Meeta be recognised as the leader in the promotion and facilitation of asset and maintenance management in Ireland.

Our Goals are to:

- Provide a useful and relevant service to our members**
- Raise the profile of asset management and maintenance in Ireland.**
- Share best practices throughout the industry.**
- Increase our membership at all levels, managerial and technical.**

Message from the Chairman, Eric Bergin.

“Meeta has been in existence for many years and has served the interests of maintenance practitioners very well. Over this period there have been significant changes in the maintenance and related fields and this has been reflected in the membership of Meeta. As a result, Meeta has increased the emphasis on all of the facets that fall under the general umbrella of asset management. Meeta has addressed this change and it is reflected in its revised title and brand. We have introduced new grades of membership for individual members and retired/student members. We hope that you can join with us in developing our society to meet all our members’ requirements.”

What you get in return for your Meeta membership fee:

What you get for your Meeta membership fee:

The committee of Meeta has agreed on a strategy to fulfil our goals:

- Organising the National Maintenance and Asset Management Conference, the National Maintenance and Asset Management Awards.
- Providing at least 4 training/education events aimed at the requirements feedback from our members.
- Providing our members with an interface to our European colleagues through our membership of the European Federation of National Maintenance Societies (EFNMS).
- Continuing to build on our relationships with relevant bodies such as the Health and Safety Authority, Sustainable Energy Ireland, the Institute of Asset management (UK), among others.
- Encouraging links throughout the asset management family, from maintenance practitioners through to asset managers.
- Facilitating networking, through the use of a technical forum on our website and regular technical meetings.
- Keeping our members up to date with developments through our newsletter and the development of a new ezine facility.
- Studying and introducing good maintenance management and promoting and initiating maintenance techniques and processes.
- Providing direction in the development of maintenance.
- Initiating and promoting the publication of the results of scientific and practical work in the maintenance field.
- Drafting maintenance guidelines and participation in technical committees for the drafting of ISO standards.
