

# Engineers Week

## Shapes instructions

Shapes are the building blocks of all engineering.  
Think of the bricks on your house (rectangles) or the  
wheels on your car (circles).

### Activity instructions:

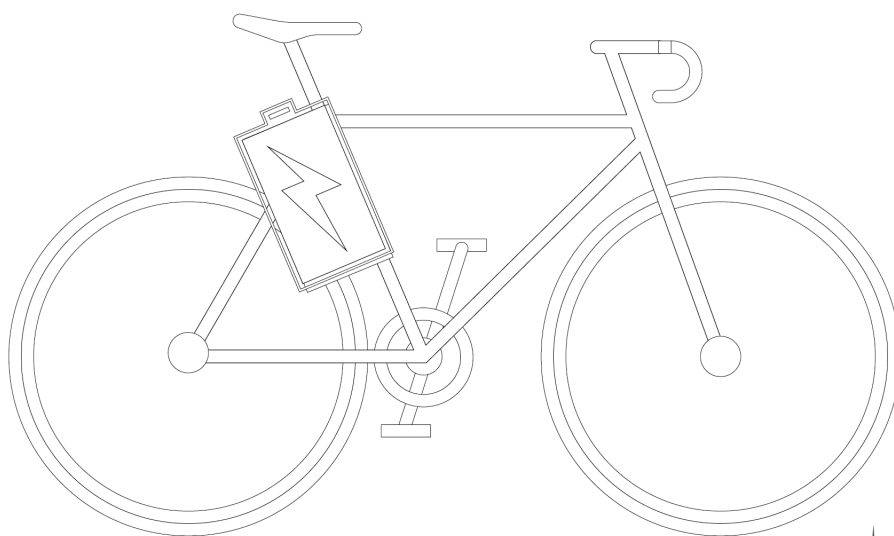

1. Colour in the 'Engineering is Everywhere' design
2. Cut out your shape.
3. Make it 3D by folding along the lines
4. Glue the tabs

Can you guess what shape you've made?

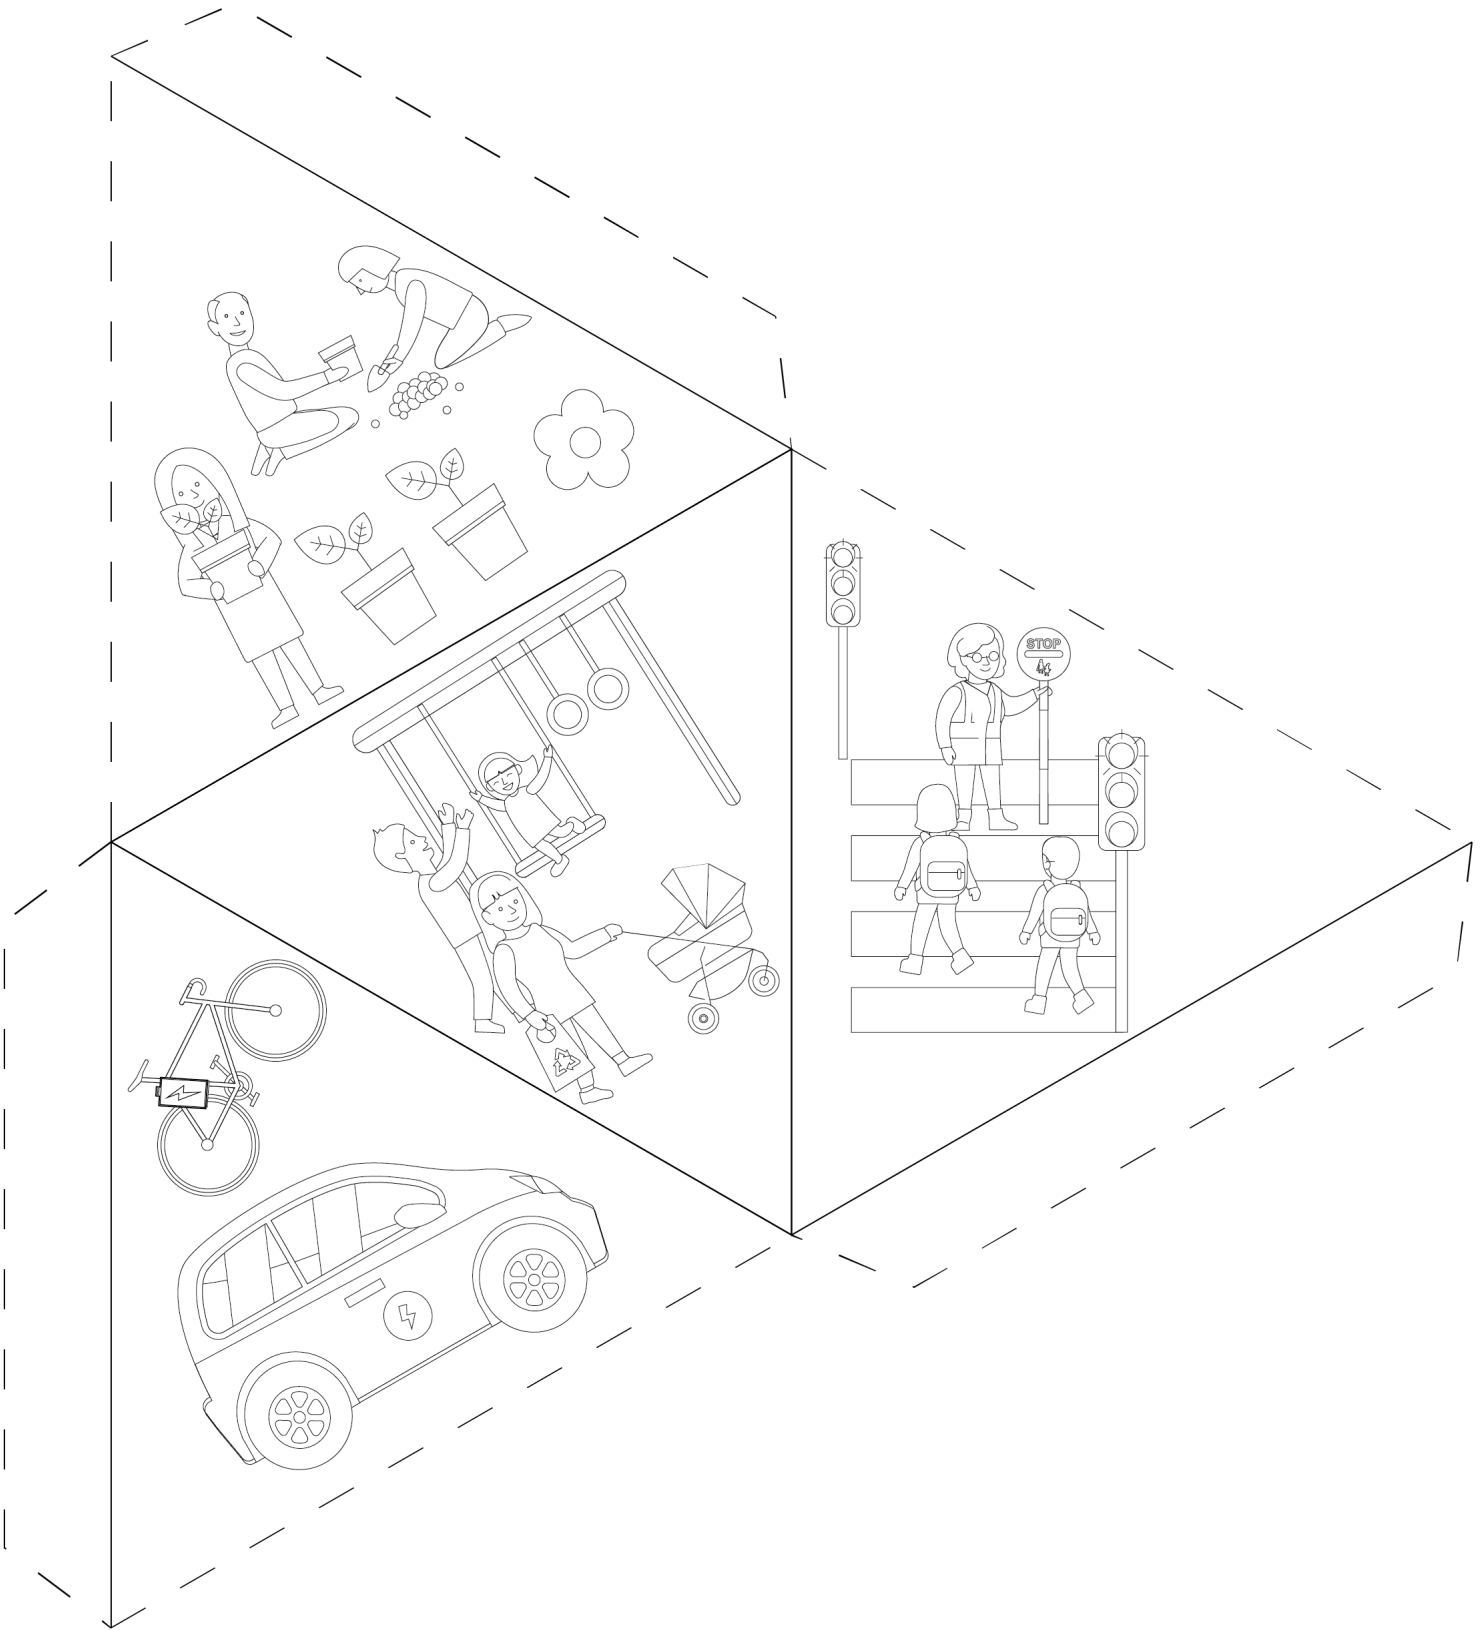

(Is it a tetrahedron, pyramid, cube or prism?)

Can you think of where you might find these shapes in the world?

For example, can you see any of these shapes on a bicycle?
