- Temporary Works Other

Learning Outcomes

On attendance of this course participants will understand the following key areas in relation to the role of Clients in construction projects:

- Understanding what are temporary works
- Understand the personnel and functions involved in temporary works
- Appreciate the legal liabilities surrounding the duty holders
- Have a clear understanding of temporary works and the responsibilities they may encounter
- Be aware of key factors in Temporary Works Systems
- Understand and be ready to implement their employers' procedures

Who Should Attend?

This course would be a benefit to engineers, project managers, designers and supervisors working for clients, consultants and contractors who need a detailed awareness of the safety and technical implications of temporary works.

Trainer

William joined the Health and Safety team of Arup in February 2017. He has over 15 years' experience in managing Health & Safety within the water/waste water, gas, civil engineering, construction, pharmaceutical and process industries. He previously headed up the Health & Safety Department of one of Europe's largest civil engineering companies, with responsibilities in the UK, Ireland and Australia, employing over 5,000 direct staff with 65 full time Health and Safety advisors.

William has an in-depth knowledge of legislation, best practice and practical applications relating to Health & Safety in both Ireland and the UK. He has provided Health & Safety training on over 22 different programmes to thousands of students over the past 10 years. He has several years' experience dealing with regulatory authorities such as the HSA, HSE, and EPA.
