

## The Maintenance and Asset Management Awards

The aim of this prestigious awards scheme is to highlight and reward the ingenuity shown by those working in maintenance and asset management in providing value to their companies.

There are 4 categories in the 2018 MEETA Awards:

- 1. Technology:** Technically based maintenance projects
- 2. Management:** Management of maintenance and assets
- 3. Health & Safety:** Integrated management approach to safe maintenance
- 4. Environment:** Projects that demonstrate energy efficiency or have an environmental impact.

A panel of independent adjudicators drawn from industry and appointed by MEETA will shortlist the entries.

Companies who have been successful and make it on to the short list will present their projects to the adjudication panel in October 2018.

The focus will be on the use of predictive maintenance strategies implemented to increase reliability, reduce cost and extend the life of ageing assets.

**Entries to be submitted by:**

**\*\*\*Friday 21st September 2018\*\*\***

The winner will be honoured at a special presentation on **Thursday 29th November 2018**, the evening before the **MEETA Annual Maintenance and Asset Management Conference on Friday 30th November 2018**.

### About MEETA:

The MEETA society is a special interest group for maintenance, reliability and asset management practitioners. Members can access relevant events and networking opportunities with peers and associated industry groups.

MEETA promotes all aspects of maintenance and asset management in industry, the public sector, semi-state bodies and third level institutions, and represents your interests on national and international issues such as education, infrastructure and all development of the practice in Ireland.

It also provides members with a professional and social network for learning and developing potential business opportunities. For details on individual events, please refer to the Events page where the full details will be made available as the programme develops.
